Features

Get a fresh perspective

From a rejuvenated Start menu, to new ways to connect to your favorite people, news, games, and content–Windows 11 is the place to think, express, and create in a natural way.

Smarter. Faster. Lighter

Gaming, creating, AI. Do it all on Intel® Core™ Ultra processors

OLED display

With display technology that lights each pixel separately, you'll get deeper blacks for richer contrast, enhanced color depth, and more power efficiency than traditional LED screens.

14 inch Eyesafe® Certified Display with a 16:10 aspect ratio

14 inch Eyesafe® Certified Display with a 16:10 aspect ratio for creating and editing content, and intuitive touchscreen technology to control your PC directly.

Variable refresh rate

Get the best performance for your creative works, while not sacrificing battery life. VRR technology allows your PC to dynamically adjust its refresh rate based on the frame rate of the content you're viewing.

Flicker-free

Using DC Dimming technology that controls brightness by adjusting direct current rather than cycling the backlight, we can eliminate screen flickering for more comfortable viewing.

★★★★☆

Excellent Premium Laptop with Great Performance — but Some Cost-Cutting in RAM, Ports & Speakers

10 days ago

I recently purchased this HP laptop and overall my experience has been very good. The performance is excellent and it truly feels like a premium machine in terms of speed, stability, and day-to-day productivity. The processor performance, smooth multitasking, and overall build quality are impressive, and I'm genuinely satisfied with how fast and reliable it is. However, at this premium price point, I feel HP has done some noticeable cost-cutting in a few key areas, which prevents it from being a perfect flagship-level product. ✅ What I Loved: Excellent overall performance and processing power Smooth multitasking and premium feel in daily usage Reliable and fast system response Great for office work, heavy multitasking, and productivity ⚠️ Areas where HP should improve (Cost Cutting Concerns): 1) RAM Speed / Quality This laptop comes with 32GB LPDDR5-5200 MT/s onboard RAM, which is good in capacity, but at this price range, I expected LPDDR5X with higher transfer rates. Since the RAM is onboard (non-upgradable), the RAM speed/quality should have been more premium. Using LPDDR5-5200 at this price feels like cost-cutting and is not ideal for a premium laptop. 2) Port Selection (Major Concern) The laptop has: 1 Thunderbolt 4 (40Gbps) USB-C 1 USB-C (10Gbps) In this premium segment, HP should provide at least 2 full-feature Thunderbolt 4 ports. Giving one full Thunderbolt 4 port and one normal 10Gbps USB-C port feels like a downgrade and cost saving. Even though the USB-C supports PD 3.1 and DisplayPort, it still doesn't match Thunderbolt-level capability. 3) Type-A USB Ports It includes: 1 USB Type-A 10Gbps 1 USB Type-A 5Gbps At this price point, both Type-A ports should be 10Gbps. Providing one 5Gbps port again feels like unnecessary cost-cutting in a premium product. 4) Speaker Quality The speakers are honestly disappointing. Sound quality feels average, almost like a normal smartphone-level loudness and depth. In a premium laptop, speakers should be much better to match the overall flagship experience. In terms of audio output, the speaker system does not justify the price.

Yes, I recommend this product.

HP OmniBook 7 AI Laptop 14-fr0116TU, Silver

Verified Purchaser

a month ago

The performance of the laptop is very average given that I have paid premium price for the machine. the 32 GB RAM never felt like one, rather it performed slightly better than my previously used Lenovo i7 x240 machine. Most of my work is typical official work, such as email, MS Office and some AI tools. But the response looks very ordinary and battery backup only lasted for 6-7 hours , but while purchasing the laptop I was told it will be 15-18 hours on regular official work.

No, I do not recommend this product.

Underrated laptop

Verified Purchaser

2 months ago

Very underrated laptop that doesn't have many reviews or hype. After seeing similar spec'd laptops from other brands selling for a much higher price, I bought this from the HP website for around 96k. Gorgeous display, super fast performance, and portable. The only concern is the really bad speakers that sound very tiny, but there is an equalizer option in HP app to improve that a bit. It comes with an extra NVMe 2280 m.2 slot, which is pretty rare for a 14" thin and light laptop. It charges very quickly, and the battery backup seems reasonable too. It can handle photo and video editing with ease. The fan is pretty silent, even at the highest performance setting, doesn't heat up much even with demanding tasks. The build quality is good as it is aluminum all over. Pretty much value for money if you are getting it for under 1L and looking for the latest processor with a stunning non-touch OLED display and an expandable storage option. Overall, I am happy with this purchase, and I hope more people review it.

Yes, I recommend this product.

★☆☆☆☆

Low quality materials.

9 days ago

[This review was collected as part of a promotion.] I bought this product 2 months back. Came with screen issues which the service centre fixed. Then there was the issue of the bezel tearing away from the screen where you can see the adhesive is tearing from the screen unevenly. They fixed it the first time but when the exact issue came back they just said it was cosmetic. Disappointing product. I owned an Elitebook for 3 years before this and that had no issue. The new Omnibooks seem to have poor hardware. The reviews in my countries service centre show the same. Avoid.

✕ No, I do not recommend this product.

★★★☆☆

Great laptop but keyboard problem spoiled the experience.

✓ Verified Purchaser

16 days ago

All things were good on my Omnibook 7 except that the ‘n’key did not engage without multiple presses. Machine submitted for warranty repair and found the part not available- hence have been waiting about a month to be able to use my brand new laptop. Great machine but would like to be able to use it.

✓ Yes, I recommend this product.

[2] Copilot in Windows requires Windows 11. Some features require an NPU. Timing of feature delivery and availability varies by market and device. Requires Microsoft account to log in. Where Copilot is not available, the Copilot key will lead to the Bing search engine. See http://aka.ms/WindowsAIFeatures .

TECHNICAL DETAILS

[1] 25 GB of free Dropbox storage for 12 months from date of registration. For complete details and terms of use, including cancellation policies, visit the Dropbox website at https://www.dropbox.com/help/space/hp-promotion. Internet service required and not included.

[2] Internet access required and not included. McAfee is pre-installed on your PC and an account is required for activation. Subscription renewal required after trial period. VPN feature is not available in India, China, Syria or North Korea. McAfee is not compatible with Windows 11 in S mode. You'll need to permanently switch out of S mode. There's no charge to switch out of S mode, but you won't be able to turn it back on.

[3] MobileMark 25 Battery life will vary depending on various factors including product model, configuration, loaded applications, features, use, wireless functionality, and power management settings. The maximum capacity of the battery will naturally decrease with time and usage. See https://bapco.com/products/mobilemark-25/ for additional details.

[5] Recharges your battery up to 50% within 30 minutes when the system is off using “shut down” command, using HP adapter provided with the notebook or recommended power adapter disclosed in specifications (see http://store.hp.com). After charging has reached 50% capacity, charging speed will return to normal speed. Charging time may vary +/-10% due to System tolerance. Available on select HP products.

[6] Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

[7] Intel® Turbo Boost performance varies depending on hardware, software and overall system configuration. See http://www.intel.com/technology/turboboost/ for more information.

[10] Battery life tested by HP using continuous FHD video playback, 1080p (1920x1080) resolution, 150 nits brightness, system audio level at 17% as image default, player audio level at 100%, played full-screen from local storage, headphone attached or through speaker (if no audio jack port), wireless on but not connected. Actual battery life will vary depending on configuration and maximum capacity will naturally decrease with time and usage.

[12] Wireless access point and Internet service required and sold separately. Availability of public wireless access points limited. Wi-Fi 7 (802.11BE) functionality requires Windows 11 2024, select Intel® Core™ or Intel® Core™ Ultra processor, and a Wi-Fi 7 router, sold separately. Wi-Fi 7 is backwards compatible with prior 802.11 specs. Available in countries where Wi-Fi 7 is supported. The specification for 802.11BE is a draft specification and is not final. If the final specification differs from the draft specification, it may affect the ability of the device to communicate with other 802.11BE devices.

[18] Percent of active plus nonactive viewing area to active viewing area plus border. Measure with lid vertical to the desk.

[19] For best results with HP Sleep and Charge, use a USB charging protocol standard cable or cable adapter with an external device.

[23] Actual battery Watt-hours (Wh) will vary from design capacity. Battery capacity will naturally decrease with shelf life, time, usage, environment, temperature, system configuration, loaded apps, features, power management settings and other factors.

[24] Must activate within 180 days of Windows activation.

[37] Weight and system dimensions may fluctuate due to configuration and manufacturing variances.

[39] Percentage of ocean-bound plastic contained in each component varies by product.

[40] Laptops manufactured with recycled metal material in product cover. Percentage of recycled metal varies by product.

[41] Keyboard components contain post-consumer recycled plastic. Percentage of post consumer recycled contained in each component varies by product.

[45] The Flicker-free capability is eliminating screen flickering through integrating DC-dimming LED backlights or LED emissions. OLED panel is functional with DC-DIMMING when above 100nits.

[46] Bluetooth® 5.4 operation requires Microsoft OS/Chrome OS support. Until Microsoft OS/Chrome OS support is available, Bluetooth® 5.4 will function as Bluetooth® 5.3 or lower.
